

KS3 Summer Seneca tasks for Science

Your science teacher(s) have added a selection of tasks to Seneca to help you with the topics that have been taught during the school closure.

These are not essential tasks, but they may be useful if:

- You have not followed the lessons set on SMHW for any reason and would like a crash course in everything covered.
- You would like to test your understanding of everything covered during the closure.
- You would like to improve your understanding of work covered during the closure.

To access these, you will need to join a class on Seneca with the correct code from the tables below.

If you are unsure how to join a class, visit the school website www.stonehenge.wilts.sch.uk and click on **curriculum** and then **Science** and select **Joining a Seneca class with a code from your teacher**.

You will find the tasks in these Seneca classes. They will remain available all through the summer holiday until the 1st September.

If you have been year 7 and will be going into year 8 in September, use this code:

Year 7 → 8 Seneca class code
ntvnbwrexp

If you have been year 8 and will be going into year 9 in September, use this code:

Year 8 → 9 Seneca class code
