

## CULTURE & ISSUES

### Curriculum Intent

*“The important thing is not to stop questioning” – Albert Einstein*

**Culture and Issues** looks at how people’s beliefs and values influence the lives they lead and the choices they make. The studies completed are in line with Wiltshire’s locally agreed syllabus and as such students will learn about Religions, but also from Religions. Our overriding aim is to develop independent learners who are able to express their own opinions in a reflective manner, and develop a range of transferable skills that will equip our students to be successful in the wider curriculum and prepare them for the future.
