

IT AND COMPUTING

Extra Curricular

At KS3 we offer the “Gold Programme” which takes about 60 pupils from Year 7 and 8 and provides them with a program of lectures and events.

For all years The Royal Signals will come for the day and talk about careers in the Army plus how they ensure secure battlefield communications in a series of activities. We will also visit Bletchley Park near London to understand the history of Cryptography, how the Word War 2 secret facility helped win the war and take part in Educational Workshops aimed at either KS3 or GCSE levels.
